EDUCATION

Dr. D. Y. Patil Institute of Technology

B.E. in Artificial Intelligence & Data Science

Pune, India

Expected Graduation: 2028

EXPERIENCE

Web Developer Intern

Jul. 2025 – Nov. 2025

ConnectFor

Remote

- Developed and maintained responsive websites for NGOs, improving their digital presence and accessibility across devices.
- Collaborated with stakeholders to implement content updates, feature enhancements, and website improvements based on organizational requirements.
- Built scalable and user-friendly web interfaces using modern web technologies while ensuring performance and maintainability.

PROJECTS

URL Shortener Backend Service | *PostgreSQL, Docker, Node.js, Express.js, TypeScript, JWT*

- Engineered a production-grade URL shortening platform featuring custom aliases, analytics tracking, and secure redirection workflows using Node.js, TypeScript, Express.js, and PostgreSQL.
- Architected a modular backend with service-layer abstraction, JWT-based authentication, refresh token rotation, email verification, and password recovery flows following industry-standard security practices.
- Optimized reliability and scalability through Dockerized deployment, database indexing, request rate limiting, schema validation with Zod, HTTP-only cookies, and secure credential management using bcrypt.

Developer Profile & Link Page Builder | *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Redis*

- Built a full-stack developer platform enabling users to create customizable portfolio and link-sharing pages through a single public profile endpoint using Next.js, TypeScript, and PostgreSQL.
- Designed scalable backend services and relational data models with PostgreSQL and Drizzle ORM, while leveraging Redis caching to reduce database load and improve profile data retrieval performance.
- Integrated external APIs including GitHub, LeetCode, and Dev.to, and implemented analytics tracking with drag-and-drop content management to deliver a dynamic and personalized developer showcase experience.

NexConnect - Professional Networking Platform | *Next.js 16, TypeScript, MongoDB, Better Auth, Razorpay*

- Architected and developed a full-stack professional networking platform integrating social networking, job discovery, company management, B2B opportunities, and event ticketing within a unified ecosystem.
- Implemented secure authentication and trust systems using Better Auth, OAuth providers, onboarding workflows, profile verification, role-based access controls, and session management to enhance platform security and user credibility.
- Engineered scalable backend APIs and data models supporting social feeds, job applications, business discussions, notifications, referral rewards, and Razorpay-powered payment workflows, enabling complex multi-feature platform interactions.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C++, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn/UI

Backend: Node.js, Express.js, Bun, FastAPI, Flask, REST APIs, API Design, BullMQ, Kafka

Databases: PostgreSQL, MySQL, MongoDB, Redis

AI & Data Science: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenAI SDK

Developer Tools: Git, GitHub, Docker, Kubernetes, Linux, Postman

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, System Design Fundamentals

Concepts: Authentication, Microservices, Containerization Concepts, Machine Learning, Artificial Intelligence
